

The Team

As the largest and most progressive osteopathic centre in the region we are proud to offer comfortable surroundings and a relaxed atmosphere in which to treat you.

Our purpose-built practise is situated adjacent to a medical practise and boasts a suite of comfortable treatment rooms fitted with the latest technology where you can discuss your problems and receive treatment in complete comfort and privacy.

We have a dedicated parking area to the rear of the practice and during peak times, there is plenty of free parking opposite the practise.

Our osteopaths are of the highest calibre, involved in teaching with the profession and to the medical fraternity. Thomas covers children and pregnant mothers. Both therapists are widely experienced in all forms of low back injury rehabilitation and are teaching at the London College of Osteopathic Medicine. To meet the team, [click here](#).

For more information, please contact the practice.
